SKILLS

Mechanical Engineering	Expert
Equipment Maintenance	Expert
Interpersonal Skills	Experienced
Problem Solving	Expert
Communicational Skills	Expert
Leadership	Expert

PROFESSIONAL SUMMARY

I am a maintenance engineer with over 10 years of experience in the engineering sector. I have been responsible for maintaining and repairing a range of mechanical and electrical equipment. My biggest achievement was ensuring that all equipment was functioning optimally and efficiently. I possess excellent problem-solving skills, which I have used to diagnose issues and implement solutions quickly and cost-effectively. My experience includes working on preventive maintenance schedules, troubleshooting, and responding to emergency breakdowns. I am highly organized and work well under pressure, as well as being able to prioritize tasks effectively. My expertise also includes working with computerized systems to perform data analysis on equipment performance. I am an excellent communicator and capable of leading teams in complex projects.

EXPERIENCE

◆ December 2019 - Now

Service Advisor

H H Emir Father Private Office [Transportation Department] / Qatar, Doha

- Greeting customers and scheduling service appointments.
- Cataloging customer concerns and comments.
- Used various measuring devices and techniques to analyze damage to the vehicles.
- Inspecting damage to vehicles and listing repairs to be done providing training to mechanics for new vehicles.
- Translating customer's repair problems into standard repair technology.
- Estimating the cost and time needed for repairs.
- Delivering repaired vehicles to customers.

◆ January 2019 - November 2019

Production and Maintenance Engineer

Qatar Rubber Industries / Qatar, Doha

As a Production and Maintenance Engineer at Qatar Rubber Industries, I was responsible for ensuring the smooth operation of production equipment and maintaining a high standard of quality control. During my tenure from January 2019 to November 2019, I gained valuable experience in managing production processes and troubleshooting mechanical issues.

- Managed production processes to meet daily targets
- Conducted regular maintenance checks on machinery
- Developed and implemented maintenance procedures

◆ November 2013 - December 2018

Maintenance Engineer

Medismart / India, Kottayam

As a Maintenance Engineer at Medismart, I was responsible for overseeing the maintenance and repair of all machinery and equipment in the company's manufacturing facility. This role required me to use my technical knowledge and problem-solving skills to ensure that all equipment was running efficiently and effectively.

LANGUAGES

- English
- Arabic
- Hindi
- Malayalam
- Tamil

- Managed maintenance schedules for all equipment
- Conducted regular inspections and identified areas for improvement
- Implemented cost-saving measures for maintenance processes
- Trained new technicians on equipment maintenance procedures
- Streamlined maintenance procedures resulting in 20% increase in efficiency

EDUCATION

◆ 2009 - 2013

Bachelor of Engineering in Mechanical Engineering

Excel Engineering College / India, Chennai
